

Walk Off Mats & Runners

Cleaning & Maintenance Instructions

The following cleaning & maintenance instructions are recommended to ensure the product maintains its desired appearance and effective performance, as well as ensuring a long life span for the product.

Daily Cleaning

- Vacuum daily with a heavy-duty commercial type vacuum cleaner to remove deeply embedded dirt particles, especially in heavy traffic areas. Matting products release more soil when dry.

Spot Removal

- If a spill occurs, use a clean absorbent cloth or paper towel to absorb as much of the liquid as possible. Spray the stained area with an all-purpose spot remover and rub the surface with a clean white cloth. Turn the cloth often to a clean side. Grease or oil based stains may require a citrus-solvent based spot remover. All-purpose and citrus-solvent spot removers are available from your local janitorial supply distributor*.

**Note – Always test spot removers in an inconspicuous area of the mat.*

Gum Removal

- Excess chewing gum should be scraped off with a standard putty knife. Chewing gum residue may require use of a citrus-solvent based spot remover available locally at your janitorial supply distributor.

Periodic Maintenance

- Walk Off Mats & Runners should be periodically deep cleaned by the Hot Water Extraction method. Best results and quickest dry times will be achieved with a commercial truck-mounted steam extraction machine. Extraction cleaning removes deeply embedded soils and should be performed as needed, based on your traffic count and soil level. A minimum quarterly extraction cleaning is recommended for high traffic applications, more often during winter months in traffic lanes.
- An alternate method is to pre-spray the mats with an all-purpose cleaning solution, scrub with a nylon bristle brush and rinse with a standard garden hose. Hang mat to dry.
